

March 2004 Open Houses

Overview

As the appointed Congestion Management Agency for Santa Clara County, the Santa Clara Valley Transportation Authority (VTA) is developing the countywide long-range transportation plan, Valley Transportation Plan 2030 (VTP 2030). This plan, updated every three years, is the foundation for the extensive array of transportation investments, services and programs that VTA and its partnering agencies will put into place over the future.

The VTP 2030 planning process presents an opportunity for VTA and the community to re-visit previously set transportation strategies and investment priorities and respond to changing conditions and community needs. Based on community input, demographic travel forecasts, and financial projections for the next 30 years, VTP 2030 will establish priorities to:

- Improve the relationship between land use and transportation decisions
- Upgrade regional roadways
- Strengthen and expand the transit system
- Implement new technologies for transportation management
- Improve conditions of local streets, bike routes, and pedestrian facilities

Get Involved

Public Involvement and participation is vital to the VTP 2030 planning process. The input received will help the VTA Board of Directors prioritize the list of projects for VTP 2030. A series of Public Meetings have been scheduled throughout Santa Clara County to present projects under consideration and to gather public comments and input. They are scheduled for the following locations, dates and times:

• Milpitas

Tuesday, March 2, 2004

6:00 p.m. to 8:00 p.m.
